

WEBBURN

Another fantastic week for Webburn. I have seen some excellent maths work and have to say the presentation and effort in writing is impressive - many children are mastering their pre-cursive letters and naturally starting to join. We have made symmetrical butterfly pizzas and found out how to make our own rainbows. There have been beautiful space pictures and Flora even had a telescope! Other wonderful news - Brendan has a new calf which he has been helping to take care of. **Mrs Dawson**

Over the last few days Webburn have been scientists learning about density and making our own lava lamps. Some of you also changed the liquids to see what happened, tested what floated at different levels and wrote some fantastic write ups. We have also looked at the poem 'Where do teachers keep their pets?' and all of you have come up with some fantastic rhymes which you used in your own writing. Noah also did an amazing job on Mrs Dawson's science game. Keep up the good job. **Miss Knott**

LOWER DART

Mabel the goat is still keeping us waiting and it has been another busy week on Seesaw. I have been impressed again by the quality of learning: Phoebe sent a fabulous picture of herself dressed as an Ancient Greek eating a Greek cake she made for Fiona and Inca's cooking challenge; Alegria and Samson made me giggle with their Ancient Greek puppet show - I never knew that they had names like Stephen and Anna! Esmeralda, with the help of her lovely family (and Mathilda) cracked carrying in subtraction and Fern made an amazing amphitheatre which her cat likes sitting in. It is lovely to see what you are all doing and I can't wait to see your funky moves from today's family dance challenge too!

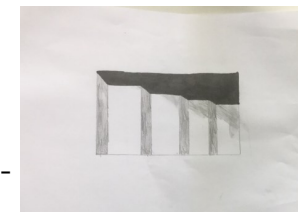

This week Mrs Reynolds and I think that Phoebe should be our Lower Dart Superhero. She has tackled every task with such enthusiasm and produced some very high quality work which we have really enjoyed looking at. Well done Phoebe. **Mrs Rolls**

This week in Lower Dart we have been learning about food chains, producing posters about the plastic pollution in our seas and creating art from leaf rubbings. This is Phoebe's turtle, from her underwater leaf rubbing picture. **Mrs Reynolds**

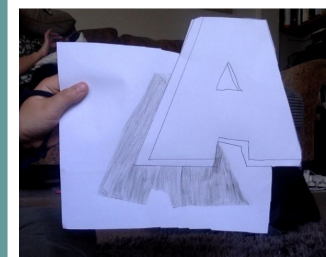

UPPER DART

We have had a great week this week. In maths the Year 4s and 5s have been looking at multiplication strategies and the Y6s have been looking at angles and doing some terrific problem solving.

We have also been looking at homes in our ancient Greek topic and in RE we have been studying Islam. In Literacy we have been looking at punctuating speech and we are planning for some story writing next week. Thanks for all your hard work this week Upper Dart. Our learners of the week are Daisy, Henry and Matilda. **Miss Thompson & Mrs Carr.**

This week in Upper Dart we have been investigating: why there are leap years, the coldest place on earth and why we have eyebrows.

We also finished off our pebble art and practiced our 3D drawing skills - these are pictures of Fern's pebble art nought and crosses and Albie's 3D 'A'. Another week of super work, well done Upper Dart. **Mrs Reynolds**
